PEOPLESOFT HCM 9.2 - UPDATE IMAGE 26

An Important PeopleSoft Update

WHAT IS UPDATE IMAGE 26?

PeopleSoft HCM 9.2, Update Image 26 is an important update that delivers new features, as part of Oracle's continuous development and selective adoption methodology, in the following modules:

- **General**
  - Enhancements have been made to the Activity Guide Composer that enable automatic releases to employees to track actions, upload documents and allow for follow-up on metrics.
  - Data masking has been improved.
  - There is now an Acknowledgement framework included as part of the Activity Guide process. Enhancements have been made to the Activity Guide Composer that enable automatic releases to employees to track their actions and progress and to upload documents.

- **Human Resource**
  - Enhancements to the Person ID allow for changing and deleting.

- **Time & Labor**
- Schedule change limit now sets a date limit on how far back a schedule can be changed.

- **Changes for Those Using Fluid**
- Add attachments to absence request
- Set-up direct deposit from a mobile device or tablet
- Recruiting homepage now available in Fluid
- Company directory provides easier access to Fluid organization chart
- Fluid timesheet now available in Fluid

- New navigation collection for hiring manager
The update also delivers new and enhanced functionality to the following products: Global Payroll, eCompensation, eDevelopment and country specific enhancements for Brazil and Australia.

Oracle is scheduled to release PeopleSoft HCM 9.2 Update Image 27 in July 2018.

HOW CAN SYMPHONY HELP?

Symphony's Oracle PeopleSoft practice is built on its deep and longstanding experience with healthcare organizations for more than 20 years, with more than 1,000 successful ERP projects to date.

With the network of one of the largest pools of PeopleSoft talent, Symphony leverages IT best practices, a 24/7 global delivery model and proven frameworks to bring transparency, predictability, and cost savings to every implementation, upgrade and managed service project. Symphony's core project methodology incorporates our experience and knowledge from successful implementations of enterprise-wide PeopleSoft applications.
